The professional's choice for precise on-screen color, i1Display Pro offers unrivaled color quality that meets the exacting demands of photographers and creatives who depend on the highest level of color accuracy.

State of the Art i1Display Instrument: Unrivaled Speed, Accuracy and Functionality
i1Display is the world's first spectrally calibrated colorimeter! Combined, with it's high-end optical system and custom designed tristimulus filter set, it offers superior color accuracy on all modern display technologies including LED & Wide Gamut LCD's, blazing fast speed, and 3-in-1 functionality.

Basic & Advanced i1Profiler Software
Two user modes provide the ultimate in flexibility and control. Choose the simple wizard guided Basic mode, or the user defined Advanced mode which offers direct access to key functions for more sophisticated workflows.

i1Display Pro Features

- X-Rite ADC [Auto Display Control] automatically adjusts your display hardware and ensures highest quality results
- Infinite control of white point, luminance, contrast ratio, gamma, and more
- Measurement, compensation, and monitoring of ambient lighting conditions
- Measurement and compensation for flare light on surface of display
- Multiple monitor and workgroup matching
- Display quality check and trending over time
